

QUALITY PHILOSOPHY

DINSE welding and brazing systems stand out due to their extreme precision, long service life and safety. For many years now, the DIN standard has been considered the standard in quality for the entire sector. The confidence that our customers place in the quality of DINSE products is our highest obligation. For this reason, we have introduced a quality management system as per DIN EN ISO 9001:2015, which has taken hold in the entire company. Thanks to this, we can ensure that DINSE quality will continue to be a market leader in the future.

Environmental protection is a solid component of the DINSE business philosophy. Exemplary production processes and the "Made in Germany" quality characteristic distinguish the DINSE brand.

Our quality principles

QUALITY

Realization of the zero-error strategy is our ultimate goal. We achieve the highest quality through systematic thinking and action. We promote awareness of quality and continuous improvement in all areas and processes.

ACHIEVEMENTS AND EXPECTATIONS

On our own initiative, we identify development opportunities and opportunities for innovation for products and processes, including in our customers' businesses. We offer our customers sustainable solutions.

TECHNOLOGY

We develop our products in compliance with economic and ecological requirements to ensure they fulfil their function as effectively as possible and they are produced to the highest quality standards using optimal processes.

SYSTEMATIC AND TARGETED PROCESSES

We organize our work processes to ensure that we achieve the highest productivity and efficiency with maximum flexibility.

PARTNERSHIP AND COOPERATION

Through their expertise and the quality of their products, our suppliers have a significant share in our success. Fairness in dealing with each other is essential to achieving our common objectives.

**IMPORTANCE OF EMPLOYEES**

Our employees are people with knowledge, skill, experience and commitment. We guide them through constant encouragement, challenges and personal feedback based on agreed targets to help them increase their performance and motivation.

ENVIRONMENT AND RESOURCES

We develop our products under the consideration of environmental aspects. Our technical solutions help to make environmentally friendly products for our customers and to conserve resources.
